

## About Us

Contributed by richart khalil

We, ArchiQ.net, are committed to a better built environment. Therefore we provide a wide range of – free and easy to access – architectural, interior design and decoration tips, articles, e-books and personalized consultation in order to help you in your needs.

We present you with a well-designed structure to guide you in every step of the process in designing, building and remodeling your homes, home-office or small businesses environment, to make up for any lack of experience, knowledge, expertise and know-how that you might have. Whether you are streamlining a small urban flat, slotting in a home workstation, creating a relaxed kitchen-living area or building your dream house, our ultimate AYQ structured method is a unique reference step by step process that will guide you in your needs to plan, decorate and furnish your assets, whatever form they might take. Do you know how to budget your improvement plans? Do you know how to define your needs? Is your storage area enough for all your family needs? Is your work integrated in an ergonomic way in your home? Are your private spaces free from noise? How do you manage your outside space in a way that makes you double your space? Is your kitchen efficient or you do you need to reassess it so you can be more comfortable? Are your kids safe enough in your home? What kind of greenery you should put in your home? Whatever your question is, we promise you to expect a personal and free answer that will guarantee you a coherent and consistent outcome. From the draft phase to the finished phase, our method is a sure way to help you find your bearings and get the needed missing information along the way. We also help you find the appropriate persons to help you in our yellow pages, all this in just one click. ArchiQ.net is the definitive source website of today's built environment design. Combining inspiration with practical advice, in depth articles, it will help you make the most of your living space, however big or small, to create an environment that you will fall in love with.
